Asset Finance

Flexible Asset Finance to Grow Your Business

What is Asset Finance?

Asset Finance is a flexible form of business funding in which the security provided to a lender is largely made up of the vehicles, equipment or plant and machinery used by businesses in their day to day operations.

Types of Assets We Finance:

- Vans & LCVs
- Trucks & Trailers
- Bus & Coach
- Construction & Yellow Plant
- Agricultural Machinery
- Engineering Equipment
- Manufacturing Machinery
- Printing Press
- IT, Telecoms & Office Equipment
- Medical Equipment
- Marine & Aviation

Asset Finance is available for both new and used assets. We can also refinance assets you already own.

Main Benefits

Cashflow: Purchase critical business assets whilst preserving valuable cash reserves.

Trading: Increased turnover covers repayment cost.

Growth: expand operations, win additional contracts.

Tax: reduce tax bills by investing in essential business assets

Security: funding primarily secured against the asset.

Invoice Finance

Release Cash from Your Invoices – Fast

What is Invoice Finance?

Invoice Finance is an extremely popular form of business funding amongst UK businesses across all sectors, in which firms are able to gain immediate access to most of the capital that is held up in their outstanding debtor book.

Invoice Finance can be known by a number of different names including factoring, invoice factoring, invoice discounting, confidential invoice discounting and CHOCS, but they are all variations on fundamentally the same concept.

Invoice Finance can allow immediate access to up to 90% of a business's debtor book, providing a vital cashflow boost that can super-charge the growth of the firm, allowing additional contract work to be tendered for and secured.

Explore Invoice Finance With Us!

Main Benefits

Cashflow: Invoice finance boosts cashflow, allowing businesses to cover costs like wages and rent without needing other loans.

Savings: Early payment discounts can save more than the cost of invoice finance, reducing overall expenses.

Admin: Outsourcing credit control reduces admin tasks and costs, letting businesses focus on growth and sales.

Growth: Access to working capital enables business growth, helping secure contracts and investments for a small cost.

VAT Loans

Healthy Cash Flow for Smooth Business Operations

What are VAT Loans?

If you're a UK business owner, you'll be familiar with the challenge of managing your VAT payments. These payments are due quarterly and can put a strain on your cash flow, particularly if you're a smaller business. One option available to businesses to help ease this burden is a 3-month VAT loan.

Key Features

- **Short-term finance:** A 3-month VAT loan helps businesses cover VAT payments, repaid within the VAT cycle to ease cashflow management.
- **Flexible loan amounts:** VAT loans match the exact amount needed for VAT payments, allowing you to borrow just what's required.
- **Quick and easy application process:** VAT loans often have a simple, fast online application, enabling quick access to needed funds.
- **Fixed interest rates:** Fixed interest rates on VAT loans help businesses budget by knowing their exact monthly payments.
- **No early repayment penalties:** Many VAT loans allow early repayment without extra costs, giving flexibility if you can repay sooner.
- **Avoid penalties for late payment:** VAT loans ensure timely VAT payments, preventing costly penalties from HMRC.

Main Benefits

Cashflow: VAT loans provide an extra funding stream, easing cashflow without affecting other facilities like overdrafts or invoice finance. This helps with managing peaks, reducing costs, and supporting growth.

Cost Saving: Avoid costly VAT late payment penalties by ensuring timely payments, preventing escalating surcharges that can reach up to 15%.

HMRC Relationship: Paying VAT on time strengthens your relationship with HMRC, reflecting a well-managed and compliant business.

Peace of Mind: Having a VAT loan facility ensures timely payments, spreads costs evenly, and reduces the stress of managing cashflow.

Security: VAT loans are often unsecured, requiring only a personal guarantee, with no charges on property—offering flexibility for business owners.

Business Loans

Drive Growth with Business Loans

What are Unsecured Business Loans?

Unsecured Business Loans for UK firms provide an infinitely flexible method of funding solutions that can be tailored to suit the specific demands and needs of every business.

Almost all business finance requires some form of security:

- Mortgages – buildings.
- Asset finance – vehicles, plant/machinery or equipment.
- Invoice Finance – debtor book.
- Overdraft – debenture over all business assets.

However unsecured business loans are different.

In most cases the only security sought, if any, is a directors personal guarantee which does not normally extend to charges against their property.

Indeed some unsecured business loans are agreed without any guarantee requirements and are advanced based on the strength of the applicant company.

Business Loans are Available for Periods from 3 to 60 Months

Main Benefits

Cashflow: Business loans improve cashflow, helping businesses manage challenges and support growth with extra capital.

Growth: Loans provide working capital for businesses to expand and scale operations.

Cost Consolidation: Business loans can consolidate debts into longer-term solutions, easing cashflow pressures.

Security: Many business loans require minimal security, relying on financial strength instead of collateral.
