Invoice Finance for Bus & Coach Firms

Unlock Cash Tied Up in Customer Invoices

Access funds from outstanding invoices quickly to cover fuel, wages, and operational costs.

FEATURES & BENEFITS

Bus and coach companies often work with local authorities, schools, or tour operators who pay on extended terms. Meanwhile, staff wages, fuel, and depot overheads require immediate payment. Invoice finance bridges this gap, providing liquidity to keep services running.

- Release up to 90% of invoice value within 24 hours.
- Manage cashflow despite long local authority or school contract terms.
- Pay drivers, mechanics, and depot staff promptly.
- Cover fuel and maintenance costs without relying on overdrafts.
- Grow with confidence, taking on new routes and contracts.

CASE STUDY

A coach company operating school transport services faced 60-day payment terms from the council. Fuel and driver wages had to be covered weekly, creating a constant cashflow squeeze. Invoice finance allowed them to release cash against invoices immediately, ensuring smooth operations. With liquidity secured, they expanded services into private hire, increasing overall profitability.

Keep Your Fleet Moving

Invoice finance provides bus and coach operators with the steady cashflow needed to keep services moving.

Speak To The Experts
